Concord Engineering & Surveying  
P.O. Box 268  
Concord, NC 28026

Subject: Surveying Services

Attention: Mr. Jim Craddock

Dear Mr. Craddock:

Concord Engineering & Surveying provided surveying services in support of Black & Veatch's evaluation of existing lightning protection systems at the Military Ocean Terminal Sunny Point (MOTSU) in Southport, NC, in January 2005. The evaluation required as-built information of the existing systems be prepared. Concord provided original solutions to help minimize the number of survey points required. They worked with our engineers to gather appropriate data that streamlined the analysis.

Concord's personnel were professional in the field. The team received compliments for their conduct and professionalism.

Black & Veatch would use Concord again and recommends them.

Very truly yours,

BLACK & VEATCH SPECIAL PROJECTS CORP.

Patrick T. Carolan  
Project Manager
