To Whom It May Concern:
Letter of Recommendation

Dear Sir or Madam:

For the past decade, Cabarrus County Schools has worked closely with Concord Engineering & Surveying, Inc. (CESI) on a multitude of new construction projects.

Concord Engineering and Surveying has a dedicated and experienced staff who have performed a wide-range of services for Cabarrus County Schools. These services have included civil design, surveying, environmental site assessments, construction materials testing, wetland delineations, and geotechnical engineering evaluations.

Concord Engineering and Surveying has been involved in the design and construction of new buildings and additions at eight elementary schools, four middle schools, and five high schools located within Cabarrus County. The total construction costs of these projects were in excess of two hundred eighty five million dollars.

Based on the professionalism and quality of the services offered by Concord Engineering and the successes we have had with them, Cabarrus County Schools highly recommends them to any organization needing the type of services offered by them.

Sincerely,

A handwritten signature in black ink, appearing to read 'D. Clickner', written over a white rectangular area.

Donald F. Clickner, CDF
Director of Facilities
Cabarrus County Schools
