Attn: Mr. Alex Rankin

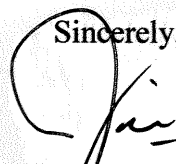

Dear Alex:

As business owners we seem to always get the bad news, but sometimes not the good news. I am writing today to thank you and your company of wonderful associates about the good experience I recently had with your organization. I am in the process of selling my business and needed to have an Environmental Phase II done in order for the purchaser to complete their loan. Your firm was recommended to me by Bank of Stanly and we proceeded with the work. My experience with Donna Allen far exceeded my expectations. I was kept informed all through the process and was never out of the loop. Donna is well qualified with her degree in Environmental Science, but her best attributes are her people skills. It is sometimes difficult to find someone that is highly skilled scientifically and highly skilled in people skills. Donna Allen has them both.

Sometimes selling a business can be quite emotional, and having Donna involved was a comfort to me since I knew that she was going to be professional in her job assignment. She even worked some over the weekend in order to get the water samples that were necessary since she knew we were on a short time line. Her people skills also came in handy working with the labs in order to turn our report around in a timely manner not to mention finding an environmental well driller on short notice. I was impressed enough with her professional performance that I hired your firm to complete another inspection well project that I had on another site. Once again, she handled that with ease.

I would highly recommend CESI to anyone needing any of your services. I am confident that CESI has more Donna Allens in other departments that are also professionals. Thanks for the great experience.

Sincerely,

James E. Nance
President
